## Fourth Technical Meet of SEA (India) SAFE BUILDING MANAGEMENT SYSTEM

Mr. Narendra, R.H, Managing Director and Mr. Manhar Amlani, Chairman of Rafiki Protection International Pvt. Ltd are seen along with Dr. M. Lakshmanan, President, Sea (India)

Mr. R.H. Narendra, Managing Director, Rafiki Protection International Pvt. Ltd. delivered a lecture on 21st December 2002 at Chennai.

The concept of Safe Building Management is very popular these days. It is not just dealing only with the Structural Safety of buildings. But Safe Building Management system is a comprehensive method of managing the safety of a building from all perspectives. It is to act as an important tool for Safety Managers to give a timely intervention and also to provide management information to help safety, security and cost control.

Some of the aspects of Safe Building Management system will cover the following:

1. Fire alarm system
2. Access control system
3. Fire fighting system
4. Security interlock system
5. Closed Circuit Television system (CCTV)
6. Graphic display of plans and layouts for risk management purposes
7. Softwares for specific application
8. Lighting Control and Power Saving

(Contd. on next page)
